Italy

— Each Italian region cherishes a richness of ancient tradition, folklore, craftsmanship and heritage.

Welcome to Italy!

No matter how much literature one reads about Italy, there is really only one way to understand why Italy has inspired so many artists through the ages: choose Italy as your next holiday destination. The atmosphere, the colours, the climate, the breathtaking landscapes, the spontaneously hospitable people, the culture, the delicious food and generous wines will capture your soul. For the romantic at heart, Italy is a paradise. What can be more romantic than a gondola ride along the canals in Venice, a late evening stroll along the banks of the Arno river in Florence or watching the sunset on the Roman skyline or in the gentle slopes of the Tuscan and Umbrian hills covered with olive groves and vineyards? History and art lovers will be stunned by the variety. Italy has been the cradle of many civilisations, the vestiges of which can be admired in their original splendour throughout the country from the small villages to the great cities. Be prepared for some shopping amongst exclusive shops and boutiques where exquisite Italian designs are proudly and elegantly displayed. Jewellery, clothes, shoes, furniture and cars are some of the items with which the Italian stylists have conquered the world.

Climate

The climate of the coastal regions are typically Mediterranean, with mild winters and generally hot and dry summers. During the winter, cloudy rainy days alternate with spells of mild, sunny weather. Generally, the hottest month is July (where temperatures can reach 35°C/94°F); the coldest month is January; the wettest month is November, with an average rainfall of 100mm; while the driest month is July, with an average rainfall of 15mm.

Introduction TO GUT HEALTH

**BY REGISTERED DIETICIAN
TANYA MARCH MSC (DIET), BSC (DIET)**

The gut harbours approximately one hundred trillion microbes which play a vital role in our health and wellness. Bacteria are the main species of microbes living in our gut and these have been shown to influence our mood, behaviour and weight. Poor dietary habits such as consuming refined food, high sugar consumption and processed junk are creating dysfunction in the gut. This dysfunction may lead to a leaky gut which has been shown to increase allergies, intolerances, inflammation and fatigue. Learning how to improve gut health is important to help bring balance back into the body's ecosystem and to start feeling more energised.

La Muerte Reposado begins its existence as a wild organic agave plant in the Karoo. The "heart" of the carefully selected mature plant is slow-cooked and then crushed to extract a sweet nectar. The nectar is slowly fermented and then quadruple distilled in micro batches to produce a clear, pure spirit with hints of citrus and sweet vanilla.

In the last very important stage of metamorphosis, the spirit rests in a lightly charred American Oak Barrel where it mellows and absorbs luscious notes of chocolate & butter.
